

## TrailManor.

Fitting a 26-foot trailer into a 17.5-foot garage is doable with a TrailManor. Its unique design aims at reducing lengths both during towing and when at

rest. Its swingaway tongue option saves two feet worth of parking length. Not only does its low profile aid in greater aerodynamics, providing better fuel economy, but this hard-sided unit utilizes push-button electronics to fully deploy once you reach your destination.

TrailManor's 2007 models underwent an interior reworking, manifesting in bright maple cabinetry, micro-fiber "suede" sofas, polished pewter hardware, and wood grain floors. The option list could benefit your crew with everything from a widescreen satellite TV to solar panels.

**Length: 19'-26' (transit)  
26'-33' (deployed)**  
**GVWR: 4023-4900 lbs.**  
**MSRP: \$24,000-\$35,000**  
**TrailManor: 800/707-7061**
